WORK EXPERIENCE

Senior Full Stack Engineer

Club / Feature Team

1/23 - Present

- Working on both sides of the stack with a front end focus to build apps from scratch with a responsive, mobile first design

- Interfacing with a variety of third party API's to implement features including scheduling, video chatting, AI image manipulation

- A focus on shipping features as quickly as possible without sacrificing code quality

- Work asynchronously and independently as part of a global remote team

Full Stack Engineer

Liftoff Mobile / Liftoff Influence

1/22 - 12/22

- Implemented administrative tools for our flagship product, allowing tight control over thousands of user submitted media

- Created a rich text editor directly in our web app to enable our team to easily and effectively communicate instructions to users

- Architected a robust data agnostic table component for visualizing data sets of 100,000+ rows. Capable of optimally handling data on both the client and server side

- Craftily executed UI designs, achieving pixel perfection with full responsiveness

- Wrote detailed pull requests and performed thorough code reviews to ensure our code base remained of the highest quality
